Gebr. Pfeiffer, Inc. Announces New Project in Cali, Colombia

Pembroke Pines, Florida – June 2010

Gebr. Pfeiffer, Inc. was recently awarded a contract to supply a new MPS “Swing Mill” at the Cement Plant for **Cementos San Marcos SA**. The plant is located near the company’s limestone and derivatives quarry in Cobo Lloreda, north of Yumbo, Colombia. The unique advantage of the MPS Swing Mill is that it can alternately grind both raw material and clinker using the same vertical roller mill. This feature allows Cementos San Marcos to increase plant efficiency while reducing their overall mill investment costs by providing them with the ability to grind different types of raw materials and clinker, interchangeably, depending on their changing needs.

The plant will also save on transportation costs, giving them a competitive advantage, due to the close proximity of the new plant and the existing mine. The project will generate approximately 210 direct jobs with an estimated production capacity of 200 thousand tons per year and is scheduled to be up and running within 24 months, with delivery of the MPS Swing Mill taking place in 12 months.

Cementos San Marcos SA is a newly established company owned by a consortium of companies; The Family Otoyá Dominguez, The Siderurgica de Occidente SIDOC S.A. and CSS Construcciones SA.
